10-

Z=7 , r=7 , r=7.5 , r=7.5

11-

- a) True
- b) True
- c) False
- d) True

12-

```
#include<iostream>
#include<math.h>
using namespace std;
int main()
{
    char c;
    cout << "please enter any char" << endl;
    cin >> c;
    int ascii = (int)c;
    cout << "the ascii code is: " << ascii << endl;
    cout << "the dec ascii = " << dec << ascii << endl;
    cout << "the hex ascii = " << hex << ascii << endl;
    system("pause");
}
```

```
D:\Projects\CSE 131\test\Debug\test.exe
please enter any char
A
the ascii code is: 65
the dec ascii = 65
the hex ascii = 41
Press any key to continue . . .
```

13-

```
#include<iostream>
#include <iomanip>
using namespace std;
void main()
{
    cout << 1990 << setw(5) << 135 << endl;
    cout << 1991 << setw(6) << 7290 << endl;
    cout << 1992 << setw(7) << 11300 << endl;
    cout << 1993 << setw(7) << 16200 << endl;
    system("pause");
}
```

The screenshot shows a Windows command prompt window titled "D:\Projects\CSE 131\test\Debug\test.exe". The window has a black background and white text. The output of the program is displayed as follows:

```
1990 135
1991 7290
1992 11300
1993 16200
Press any key to continue . . .
```

The text is aligned to the left, and the output matches the code provided above. The window includes standard Windows window controls (minimize, maximize, close) in the top right corner.

enter your paragraph
Well I am too lazy to write the other paragraph SO i hope you like this one
A occurs 5
B occurs 0
C occurs 0
D occurs 0
E occurs 7
F occurs 0
G occurs 2
H occurs 5
I occurs 5
J occurs 0
K occurs 1
L occurs 4
M occurs 1
N occurs 1
O occurs 8
P occurs 2
Q occurs 0
R occurs 4
S occurs 2
T occurs 6
U occurs 1
V occurs 0
W occurs 2
X occurs 0
Y occurs 2
Z occurs 1
Press any key to continue . . . .
```

please enter your sentence
well because i am programming and i wont be programming tommorow i used this paragraph and i put three programming words
just like the original hope you like it
The occurance of the world 'programming' is 3
Press any key to continue . . .
```

9-

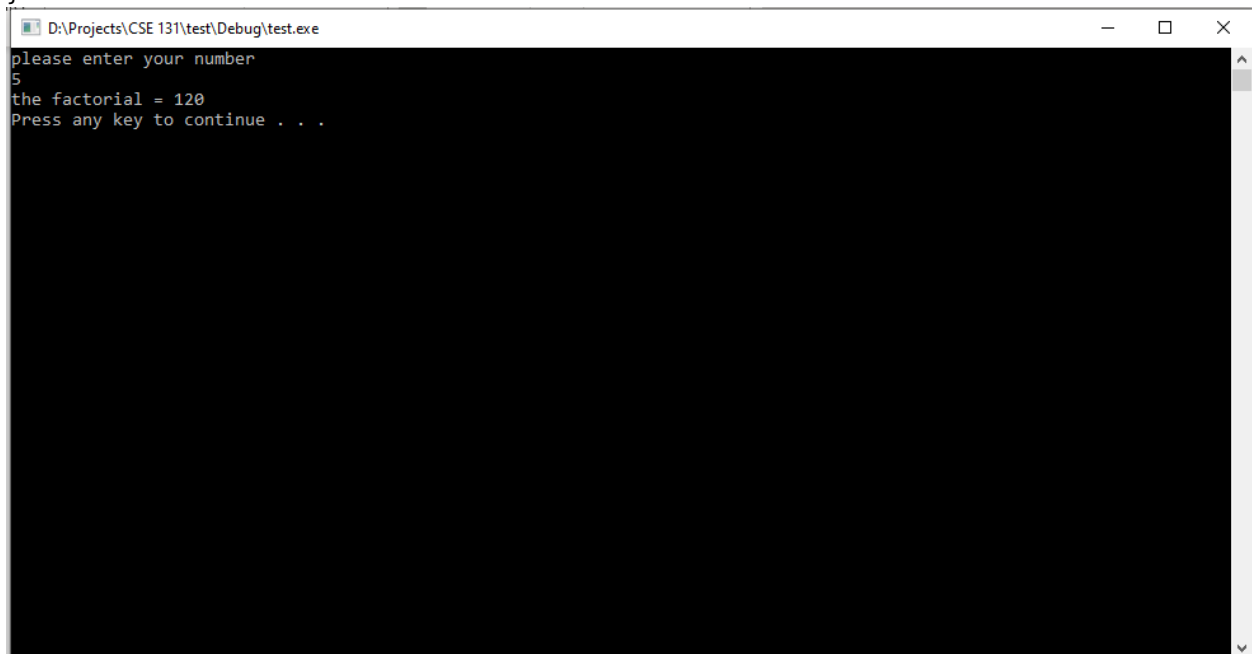

- I. copies the contents of the src to the des.
- II. return the length of a string without counting the null terminator.
- III. compares str1 with str2 and returns 0 if str1 == str2, returns 1 if str1 < str2 and returns 1 if str1 > str2
- IV. returns the integer value of a string for example "123"---123
- V. returns the float value of a string

A screenshot of a Windows command prompt window. The title bar shows the file path "D:\Projects\CSE 131\test\Debug\test.exe". The window has standard Windows window controls (minimize, maximize, close) on the right. The command prompt displays the following text:

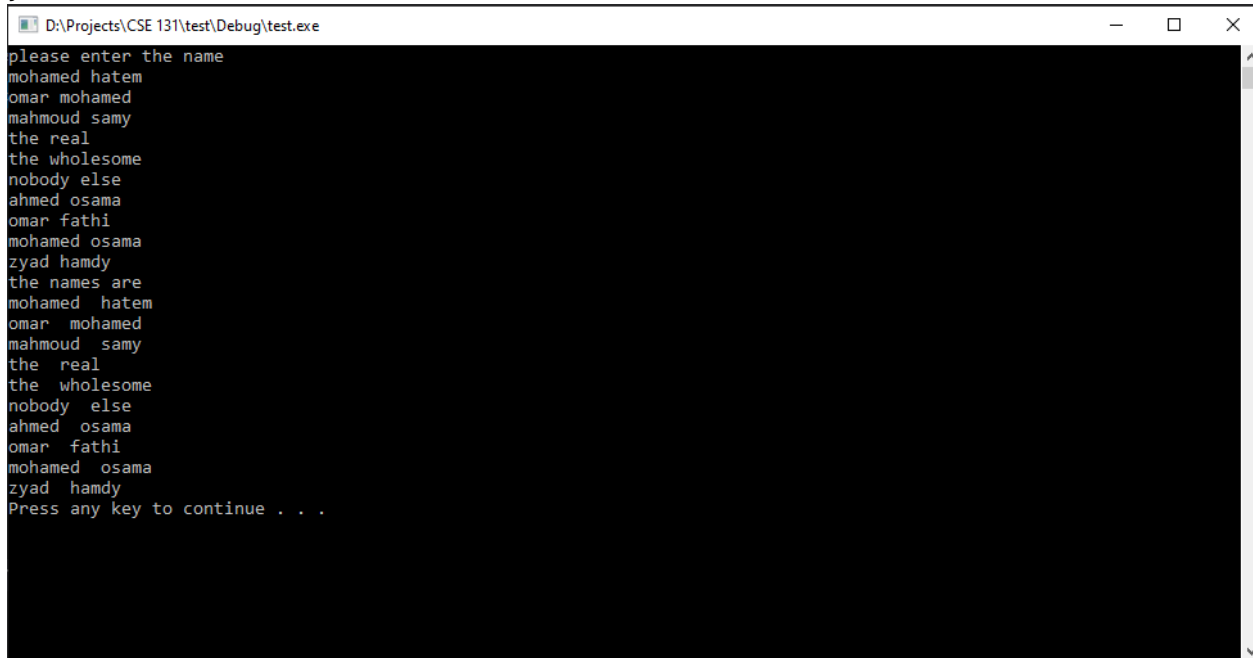

```
enter number of names
3
enter your names
mohamed
hatem
karim
the order is :
hatem
karim
mohamed
Press any key to continue . . .
```

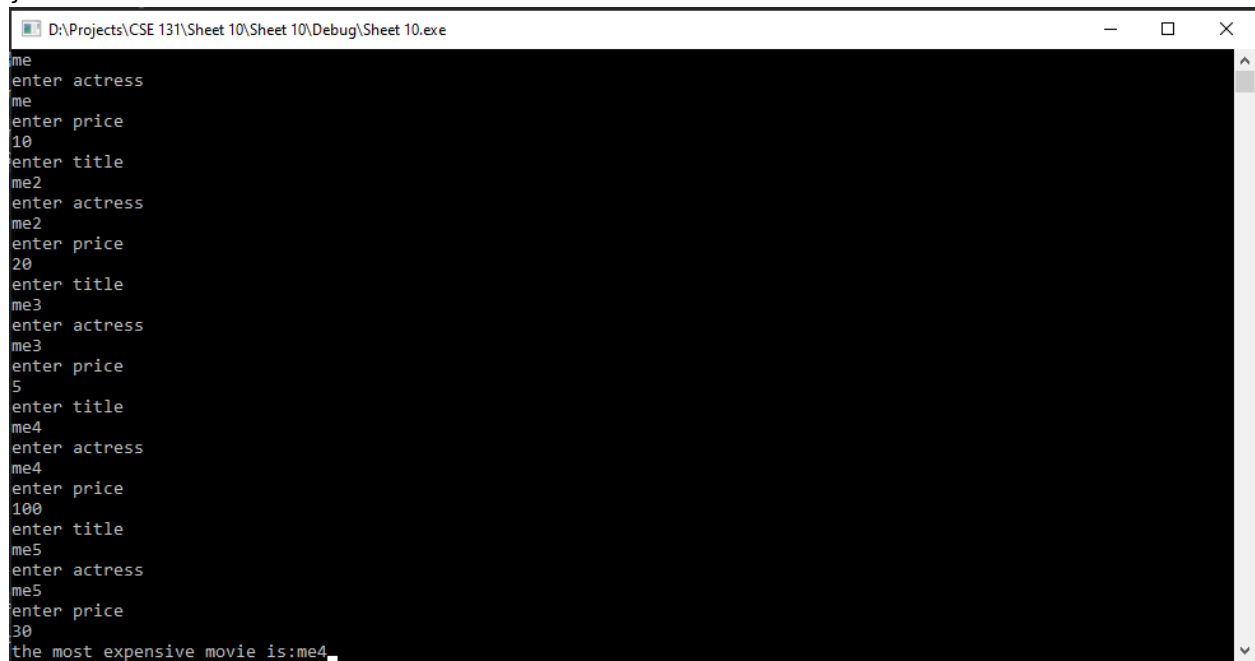

The text is displayed in a monospaced font. The input "3" and the names "mohamed", "hatem", and "karim" are entered on separate lines. The output "the order is :", "hatem", "karim", and "mohamed" are also on separate lines. The prompt "Press any key to continue . . ." is at the bottom. A vertical scrollbar is visible on the right side of the command prompt window.
